Re-accredited by NAAC with 'A++' Grade | Awarded Category – I by UGC

Founder: Prof. Dr. S. B. Mujumdar, M. Sc., Ph. D. (Awarded Padma Bhushan and Padma Shri by President of India)

● Experiment No.: 8

1. Title: Access and validate form fields using events; design a gym admission form with live input checks.

2. Software/Tools Required:

1. Visual Studio Code (VS Code)
2. Google Chrome
3. HTML5
4. JavaScript
5. CSS

3. Theory: A gym admission form collects user details such as name, age, email, phone number, gender, and membership type. JavaScript events like input, change, blur, and submit are used to detect user actions and perform live validation. Form validation ensures that all required fields are filled correctly, email and phone number formats are valid, and age falls within the allowed range. By accessing form elements through the DOM, JavaScript provides instant feedback, improves user experience, and prevents invalid data from being submitted.

4. Output:

Iron Pulse Gym Admission

Full Name
Shantanu Jumale

Email Address
shantanu.jumale.batch2024@sitnagpur.siu.edu.in

Age (Must be 16+)
20

Membership Plan
Premium (Gym + Pool)

Submit Application

5. Result/Conclusion:

The gym admission form was successfully developed with live input validation using JavaScript events. The application validates user input in real time and displays appropriate error messages for invalid entries. It ensures accurate data collection before form submission and enhances the user experience. This experiment improves understanding of DOM access, event handling, and client-side form validation in JavaScript.
